

# PulseCare™ Health and Safety

## PULSECARE™ HEALTH AND SAFETY

In 2008 and 2009, over 130,000 injuries and 180 deaths were reported in work-related incidents in the U.K. In the same period, 28 million working days were lost due to injury or illness. Working in care, risks are high. Lifting service users, handling medicine and cleaning activities can all present risks to your service users and employees. Slips, trips and falls are the number-one danger of injury. Equally, burns and fire are always a concern when dealing with heated appliances, heavy pans and open grills. The risk to your business, employees and service users can be greatly reduced by making available training that reflects your business and the associated hazards.

**PulseLearning** creates learning solutions that bring measurable business value to our clients. We achieve this through a high-energy, client-centric approach that combines excellence in people, process, partners, technology and innovation.

The PulseCare™ solution from **PulseLearning** was custom-created for care home organisations. Our solution provides a complete education and training solution that overcomes the day-to-day barriers to achieving health and safety compliance in a regulated environment. These barriers include dispersed workforces, high employee turnover and non-native speakers. Our Health and Safety course enables your employees to be fully compliant with health and safety requirements, including the Health and Safety at Work Act (1974) and the Health and Safety Offences Act (2008).

Our PulseCare™ solution leverages the highly accessible nature of the Web to reduce the time and cost associated with training. The PulseCare™ solution is available to your employees whether they are currently online or not. In line with your needs, our solution may be supplemented by a variety of tailored components, including quarterly Web seminars with leading industry experts and on-site consultancy.

## COURSE CONTENT

Our comprehensive four-hour Health and Safety course helps ensure best practices and foster a working culture that is safe and alert to potential hazards. The course includes:

- ▶ Health and safety laws for employers, managers and team members
- ▶ Risk assessment procedures and mitigation controls
- ▶ Incident reporting and continuous improvement
- ▶ Fire safety in the workplace
- ▶ Bomb threat mitigation and evacuation procedures
- ▶ Emergency first aid
- ▶ Safe handling of hazardous substances
- ▶ Preventing slips, trips and falls
- ▶ Safe handling techniques for heavy items
- ▶ Safe lifting of residents

**PulseLearning**

Your Learning & Business Performance Partner

**PulseCare™** Solution

Comprehensive Suite of Compliance & Business Performance Training

Health and Safety Course

### MEASURABLE BUSINESS ADVANTAGE

PulseCare™ learning solutions offer the following advantages:

- ▶ A safer work environment, improved compliance with legislation and reduced frequency of compensation claims
- ▶ Reduced risk to your business, residents and employees
- ▶ Enhanced support through updated industry best practices, benchmarking and quarterly seminars with industry experts
- ▶ A creative approach to collaborative and social learning and talent management
- ▶ Real-time monitoring, tracking and reporting on learning performance linked to compliance

### DELIVERY AND REPORTING FEATURES

Our online solution includes the following features:

- ▶ Self-paced, modularised and engaging eLearning with optional role-specific training
- ▶ Extensive out-of-the-box reports for tracking training performance and compliance
- ▶ Rapid installation with minimal demands on client IT resources
- ▶ Access to the course from any Web-enabled computer
