

PulseCare™ Infection Prevention and Control

PULSECARE™ INFECTION PREVENTION AND CONTROL

There are over 1.5 million social care workers in the U.K. Social care workers are exposed daily to a multitude of infectious diseases. How do you ensure that your employees can protect themselves and others from contracting and spreading diseases?

PulseLearning creates learning solutions that bring measurable business value to our clients. We achieve this through a high-energy, client-centric approach that combines excellence in people, process, partners, technology and innovation.

The PulseCare™ solution from **PulseLearning** was custom-created for care organisations. Our solution provides a complete education and training solution that overcomes the day-to-day barriers to achieving infection prevention and control compliance. These barriers include dispersed workforces, high employee turnover and non-native speakers.

The PulseCare™ Infection Prevention and Control course goes beyond making your employees compliant with the infection prevention and control knowledge sets issued by Skills for Care in February 2007. Our course seeks to support social care employees in all environments and across the industry, either entering the care service or changing roles, with the knowledge sets required to prevent and control the spread of infectious disease. Our course is purpose-built to help you reduce instances of infection among your service users and staff.

Our PulseCare™ solution leverages the highly accessible nature of the Web to reduce the time and cost associated with training. The PulseCare™ solution is available to your employees whether they are currently online or not. In line with your needs, our solution can be supplemented by a variety of tailored components, including quarterly Web seminars with leading industry experts and on-site consultancy.

COURSE CONTENT

Our one-hour Infection Prevention and Control in Care course includes:

- ▶ Causes and spreading of infection
- ▶ Preventing and controlling the spread of infection
- ▶ Legislation relevant to infection prevention and control
- ▶ Roles, responsibilities and boundaries
