

# PulseCare™ Medicine Administration Awareness

## **PULSECARE™ MEDICINE ADMINISTRATION AWARENESS**

There are over 1.5 million social care workers in the U.K. Social care includes residential care, domiciliary care and social work with all its specialisms. The responsibilities for many social care workers include the administration of medication. The challenge is to ensure these workers have the skills and knowledge necessary to correctly and safely administer medications.

**PulseLearning** creates learning solutions that bring measurable business value to our clients. We achieve this through a high-energy, client-centric approach that combines excellence in people, process, partners, technology and innovation.

The Pulse**Care**™ solution from **PulseLearning** was custom-created for care home organisations. Our solution provides a complete education and training solution that overcomes the day-to-day barriers to achieving medicine administration compliance. These barriers include dispersed workforces, high employee turnover and non-native speakers.

The Pulse**Care**™ Medicine Administration Awareness course goes beyond making your employees compliant with the medicine administration knowledge sets issued by Skills for Care in February 2007. It provides the foundation knowledge required by your employees to safely administer medications. This course is aimed at all professionals working in care homes responsible for medicine administration to provide them with the confidence and skills they need to safely administer medications to individuals.

Our Pulse**Care**™ solution leverages the highly accessible nature of the Web to reduce the time and cost associated with training. The Pulse**Care**™ solution is available to your employees whether they are currently online or not. In line with your needs, our solution can be supplemented by a variety of tailored components, including quarterly Web seminars with leading industry experts and on-site consultancy.

## **COURSE CONTENT**

Our 1.5-hour Medicine Administration Awareness course includes:

- ▶ Legislation and medication
- ▶ Roles, responsibilities and boundaries
